#### Mare Island Inaccessible

The Mare Island navy vard is very both on account of its great distance from San Francisco and the shallow-ness of the channel. The muddy water of the San Pablo bay is also said to work havor with the condensers of the warships. No battleship injured in action could be taken to Mare Island even for temporary repairs nor could the yard be reached by a number of the heavy battleships or heavy cruis-ers, even when uninjured. But as \$14. 000,000 already has been spent on this yard, the secretary thinks that in order to avoid a total loss it would be wise to utilize it for such vessels can reach it and for repair work.

It will be necessary to establish a docking and repair station for battle-ships on San Francisco bay in some locality yet to be selected and mean-while the Pacific coast must depend on Puget Sound.

Pearl Harbor will be made the principal insular defense base in the Pacific ocean; Olongapo, in the Philippines, is to be a small re; r station and the station at Cavite is to be disof, its tools being transported to Olongapo.
